Anna,

It seems that you have made several different requests for information concerning the Pasco Landfill site . I believe you have two with EPA and others with the Washington State Department of Ecology . Chuck with the State Department of Ecology said he spoke with you at length and said you were working with him and Roger Johnson (I sent him your request) who is managing the Administrative Record for the site.

I have tried to call you on several occasions to see which information request you want to go forward with . I don't believe you want to pay for duplicate copies of any of the information .

We need to close out your request formally so you don't get charged for information you might already be getting from Chuck and Roger.

Please email me or call so we can close out the outstanding information requests or get you the information you want.
